

# Tight Gas Reservoirs

## - Solutions

Group-E

Sarfaraz Siddiqui, Pervez Alam Sethi, Shahid, Abdul Malik Kakar, Tofeeq Ahmed, Ajaz Sarwar, Imtiaz Noor, Shakeel Alam, Abdul Rauf Mirza, Muhammad Yasir

# Technical

- The TGR definition should be revised based on local geological conditions and permeability cut off should  $< 1$  md and Flow rate  $< 1$  MMSCFD
- Human resource development and transfer of technology should be mandatory for service companies
- Centralized R&D budget should be allocated
- Involvement of academia and exposure to new technology
- Realistic GIIP of TGR after sharing information among E&P

# Technical (Cont...)

- Proper planning to exploit TGR and specific data requirement
- The data related to TGR should be shared among E&P through some forum
- Basin studies and sequence stratigraphic analysis to identify the distribution of TGR at Govt level

# Attitude

- Management should be convinced to go for TGR

# Commercial

- Comprehensive policy from the regulatory authority to exploit TGR
- Tax rebates on equipment import
- Service companies and operators partnership on risk and reward basis

# Political

- Geo political unrest and inaccessibility- beyond scope
